

GEOGRAPHY 1900
Extreme Weather and Climate
Spring Semester 2019

Instructor:

Alvaro Montenegro

Office: 1152 Derby Hall (DB)

Phone: 688-5451

Email: montenegro.8@osu.edu - preferred

Office Hours: Wednesdays, 9:00 to 11:00 PM OR by appointment

Teaching Assistants:

Emilio Mateo

Office: DB 1155

Email: mateo.9@buckeyemail.osu.edu- preferred

Phone: 614-292-2705

Office Hours Wednesdays 2:15 to 4:15 OR by appointment

Mary Grace Thibault

Office: DB 1083

Email: thibault.15@buckeyemail.osu.edu- preferred

Phone: 614-292-2705

Office Hours: Mondays 2:30 to 4:30 OR by appointment

Teaching Assistant: Jerry Zou

Office: Derby Hall (DB) 1155

Email: zou.219@buckeyemail.osu.edu -preferred

Phone: 292-2704

Phone: 614-292-1094

Office Hours: Mondays, 2:00 to 4:00 PM OR by appointment

Course Details

Lecture: Monday, Wednesday and Friday, 11:30 to 12:25 PM Stillman Hall (SH) 100

Labs: Monday, 9:35– 10:55 AM in Derby Hall (DB) 0070 – Mary Grace

Monday, 12:45– 2:05 PM in Derby Hall (DB) 0070 – Mary Grace

Wednesday, 9:35– 10:55 AM in Derby Hall (DB) 0070 - Emilio

Wednesday 12:45– 2:05 PM in Derby Hall (DB) 0070 - Emilio

Friday 9:35– 10:55 AM in Derby Hall (DB) 0070 – Jerry

Friday 12:45– 2:05 AM in Derby Hall (DB) 0070 – Jerry

Course Materials

Text: Aguado, E. and J. E. Burt, 2012. *Understanding Weather and Climate*, 7th edition.

Pearson Education, Inc. Upper Saddle River, NJ. (ISBN: 9780321769633) **(Suggested)**

Lab Manual: Course packet distributed by UniPrint at <http://uniprint.osu.edu>, available at Barnes & Noble – The OSU Bookstore at Gateway/15th & High **(Required)**

Website: The Carmen course management system <http://carmen.osu.edu>

Course Description

This course will serve as an introduction to the study of the atmosphere. The primary objective is to provide students with a comprehensive understanding of the atmosphere and the processes that govern its behavior. In this course students will be exposed to various aspects of meteorology, including the structure and behavior of the atmosphere, global energy balance and transfer, atmospheric circulation, precipitation processes, weather systems and severe weather. This course will emphasize the inter-relationship existing between the atmosphere, hydrosphere, biosphere and lithosphere and will illustrate how the movement of matter and energy between these spheres is responsible for the weather, climate and environments we experience on Earth.

Science GEC Course

Natural Science coursework fosters students' understanding of the principles, theories, and methods of modern science, the relationship between science and technology, the implications of scientific discoveries and the potential of science and technology to address problems of the contemporary world. Below are the four general Natural Science GE outcomes and how each will be addressed by the course.

1. Students understand the basic facts, principles, theories and methods of modern science.
 - a. Lectures, textbook and exams for basic facts, principles and theories
 - b. Labs will demonstrate and give hands on experience with basic methods, and reinforce understanding of principles with experiments.
2. Students learn key events in the history of science.
 - a. Progressive understanding of atmospheric dynamics will be explained using key examples like mid-latitude cyclones.

- b. Basic history of meteorology and history of our understanding of anthropogenic climate change is explicitly covered by lectures.
3. Students provide examples of the inter-dependence of scientific and technological developments.
 - a. Lab exercises will reinforce how technology infuses understanding, and how instrumentation to measure atmospheric phenomena has changed over time.
 - b. Measurements of the atmosphere, its qualities and motions are key to atmospheric science, and lectures and readings will highlight specific examples of how technology has enhanced theoretical understanding, and vice versa.
4. Students discuss social and philosophical implications of scientific discoveries and understand the potential of science and technology to address problems of the contemporary world.
 - a. In lectures and readings about climate change, ozone destruction, and atmospheric pollution students will engage with the social implications of science discoveries and how these both mold and are molded by worldviews and political perspectives.

Student Evaluation

Participation:

Attendance. One third (5 of the total 15 points) of the participation grade will be passed on lecture attendance. Each student is entitled to one unjustified absence during the semester. Participation will be recorded using TopHat. It is your responsibility to make sure your device is communicating correctly with TopHat.

Packback. The other two thirds (10 points) will be based your activity in Packback. You will have to purchase a subscription to this service for U\$ 25.00. This can be done online or at the University Bookstore. Participation will be measured weekly. For full grade on this aspect of participation you will be required to send in one question and answer two questions per week on the platform. Submitted questions and answer will be gauged and those deemed of sufficient quality will count for full grade. This will be determined by the sum of the “curiosity points” generated by your submission. Each question/answer can generate a maximum of 100 points. For full credit a minimum of 125/300 “curiosity points” is required per week. Activity starts on the second week of class. No submissions will be required during Thanksgiving week (November 19-23). The last submissions should be made on the week ending on Sat, December 8. Submissions are accepted until Sunday 11:59 PM of the previous week. My goal with Packback is to have students think about and interact with the course content in other ways than preparation for exams. I hope the effort to elaborate questions and respond to classmates’ doubts lead students to think critically about what is being discussed in class. I also

hope the activity results in opportunities for students to link class material to other information pertinent to their personal interests and/or other courses.

To start posting on Packback Questions:

1. Navigate to <https://Packback.co/questions> and click “Register as a new student”.

Note: If you already have an account on Packback you can login with your credentials.

2. **Make sure to register with your OSU email address and real first name and last name.**

Enter our class community’s access code into the “Join a new Community” module on your dashboard.

Our community access code: 7e37d61a-4298-4a87-8d25-f949378d8344

Follow the instructions on your screen to finish your registration.

More details on the Packback participation activity, including examples of suitable questions/answers check Community Guideline page:

<https://blog.packback.co/2013/03/05/packback-questions-community-guidelines/>

For a brief introduction to Packback Questions and why we are using it in class, watch this video: vimeo.com/packback/Welcome-to-Packback-Questions

Any questions regarding the platform can be directed to holla@packback.co.

Labs: Laboratory exercises will be conducted during recitations. Attendance is required.

Students should read through each lab and be prepared **PRIOR** to the lab session. It is the responsibility of each student to turn in the required laboratory exercise at the beginning of the lab class on the due date. All lab exercises must be completed **INDIVIDUALLY**, although working in groups is encouraged.

Exams: There will be three exams. Exams, including the final, are mostly non-cumulative but questions about some important themes/concepts will be present in more than one exam. These themes/concepts will be clearly communicated to the class prior to exams. Make-up exams are only allowed in the event of a documented emergency or through **PRIOR** consent of the instructor. All exams will take place at the regular lecture room. Midterm exams occur during regular lecture hours and the final exam will take place in the regular lecture room on April 26 from 12:00 to 1:45 PM. All exams, including the final, will consist exclusively of multiple-choice questions.

Final Grade Break Up

Participation - Attendance	5%	
Participation - Packback	10%	
Labs	30%	
Midterm Exam 1	15%	2/4
Midterm Exam 2	20%	3/8
Final Exam	20%	4/26-12:00

Extra Credit

Three distinct activities will provide students with the opportunity of earning up to 7 extra points on their final course grade.

Syllabus test: There is the potential for 1 extra credit point on the final course grade for those who turn in a perfect syllabus test. The test is available on Carmen and should be submitted online via Carmen by the end of the day on Friday, January 18. There will be no partial grades. To get the 1 extra credit point all responses must be correct. One error = no extra credit. Even those that hand in a perfect syllabus test can lose the 1 point at any time during the semester if they ask one of the instructors a question that could be answered with information present on the syllabus.

The 1900 Weather Creative: Create and submit a piece of art in some way related to weather and climate or other content discussed in class for up to 4 extra credit points on the final course grade. The effort can be individual or shared by up to three students. A variety of forms will be accepted, including but not limited to: poetry, music, short text, photography, painting/drawing, sculpture, animation, film, dance, short theatrical sketch and video games.

Important limitations:

- All submissions should be original efforts.
- Submissions should be made before the end of the day on Friday, April 5.
- A representation of the piece must be uploaded to Carmen. This is simple for text or static images, but those who opt for performance (dance, theater), film, animation, song, etc... will have to record their work in some electronic format that can be uploaded.

- All submissions should have a maximum duration of two and a half minutes, or 150 seconds. This includes poetry and text (the average person talks at about 125-150 words per minute).

While connections might be somewhat indirect, submissions must be related to the subject of the course. You will be able to attach a short (max 100 words) legend explaining the connection. The instructor will reject submissions deemed not sufficiently related to the themes discussed in class.

Submissions will be curated and, if there is sufficient quantity and quality, we will hold a show with the best entries during our next-to-last lecture on Friday, April 19. At this time the class will vote on their favorite submissions. There will be prizes for the top submissions!

Citizen science cloud observations: In this individual effort, up to 2 extra credit points on the final course grade will be awarded to students who act as observers for the “Student Cloud Observations Online (S’COOL)” project. This is a NASA led citizen science initiative aimed at collecting cloud cover data in order to improve satellite-based observations. The amount of extra credit received will be determined by the total number of reports handed in. Each report is worth 0.08 points. These are accumulated until 2 extra credit points are obtained (25 reports). Students are encouraged to perform more than 25 observations, but those who do will still receive the maximum 2 extra credit points. To be valid, reports must be based on observations performed between Jan 7 and April 22. For full credit reports must be submitted to Carmen by April 22, the last day of classes. More details on how to perform observations and complete reports are found on the Extra Credit section in Carmen.

Special Statement Regarding Absences

Based on the Office of the Provost recommendations on the current flu situation, students that feel ill are encouraged to stay home and isolate themselves from others. In addition, the “Explanatory Statement for Absence from Class” self-reporting form available online (<https://shs.osu.edu/posts/documents/absence-excuse-form2.pdf>) from the Wilce Student Health Center will be accepted as documentation of medical absence and reasonable efforts will be made to provide for make-up work opportunities. All make-ups from documented absences must be **completed within one week** of the original scheduled date.

Academic Misconduct

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term “academic misconduct” includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct webpage (http://studentaffairs.osu.edu/resource_csc.asp).

Disability Services

The University strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability (including mental health, chronic or temporary medical conditions), please let me know immediately so that we can privately discuss options. You are also welcome to register with Student Life Disability Services to establish reasonable accommodations. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. **SLDS contact information:** slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue

Lecture Schedule*

Lecture**	Chapter	Theme
1	1	Atmosphere Composition
2	1/2	Comp. of the Atm./Radiation
3	2	Radiation in the Atmosphere
4	2/3	Seasons/Energy Balance
5	3	Temperature
Feb 4⁺		First Exam
6	4	Pressure and Wind
7	4/5	Pressure and Wind /Moisture
8	5/6	Moisture / Cloud Formation
9	7	Precipitation Processes
10	8	Atmospheric Circulation
11	8/9	Air Masses and Fronts
March 8⁺		Second Exam
12	10	Mid Latitude Cyclones
13	11	Tornadoes
14	12	Tropical Cyclones
15	15/16	Climate and Climate Change
16	15/16	Climate and Climate Change
17	14	Atmospheric Pollution
April 26⁺⁺		Final - 12:00 - 1:45 PM

*This is a tentative schedule. While exam dates will not change, the actual material presented in lectures at the time of any exam might not mirror the schedule precisely. The material covered in each exam will be clearly defined on a study guide that will be published on Carmen.

**Lecture means a cohesive presentation covering a whole theme, not a 55-minute class.

⁺ Midterms take place during regular class times in the regular lecture room

⁺⁺ Final exam takes place in the regular lecture room
