GEOGRAPHY 1900
Extreme Weather and Climate
Autumn Semester 2016

Instructor: Alvaro Montenegro
Office: 1152 Derby Hall (DB)
Phone: 688-5451
Email: montenegro.8@osu.edu - preferred
Office Hours: Tuesdays, 11:30 AM - 1:30 PM OR by appointment

Teaching Assistants:

Dan D’Amico
Office: DB 1070
Email: damico.43@buckeyemail.osu.edu - preferred
Phone: 614-292-2705
Office Hours: Mondays and Wednesdays, 3:45-5:00 PM OR by appointment

Megan Jones
Office: DB 1070
Email: jones.5837@buckeyemail.osu.edu - preferred
Phone: 614-292-2705
Office Hours: Mondays and Wednesdays, 4:00-5:15 PM OR by appointment

Gabriel Zeballos Castellon
Office: DB 1070
Email: zeballoscastellon.1@buckeyemail.osu.edu - preferred
Phone: 614-292-2705
Office Hours: Thursdays and Fridays, 2:00-3:15 PM OR by appointment

Course Details

Lecture: Monday, Wednesday and Friday, 9:10 to 10:05 AM Knowlton Hall (KN) 250

Labs:  
15834 - Monday, 11:10 AM – 12:30 PM in Derby Hall (DB) 0070 - Megan
15836 - Monday, 2:20 – 3:40 PM in Derby Hall (DB) 0070 - Dan
15838 - Tuesday, 11:10 AM – 12:30 PM in Derby Hall (DB) 0070 - Gabriel
15835 – Wednesday, 11:10 AM – 12:30 PM in Derby Hall (DB) 0070 - Megan
15837 – Wednesday, 2:20 – 3:40 PM in Derby Hall (DB) 0070 - Dan
21255 - Thursday, 11:10 AM – 12:30 PM in Derby Hall (DB) 0070 - Gabriel
Course Materials

Lab Manual: Course packet distributed by UniPrint at http://uniprint.osu.edu, available at OSU Bookstores (at Central Classroom and South Campus Gateway Barnes & Noble) (Required)

Website: The Carmen course management system http://carmen.osu.edu

Course Description

This course will serve as an introduction to the study of the atmosphere. The primary objective is to provide students with a comprehensive understanding of the atmosphere and the processes that govern its behavior. In this course students will be exposed to various aspects of meteorology, including the structure and behavior of the atmosphere, global energy balance and transfer, atmospheric circulation, precipitation processes, weather systems and severe weather. This course will emphasize the inter-relationship existing between the atmosphere, hydrosphere, biosphere and lithosphere and will illustrate how the movement of matter and energy between these spheres is responsible for the weather, climate and environments we experience on Earth.

Science GEC Course

Natural Science coursework fosters students’ understanding of the principles, theories, and methods of modern science, the relationship between science and technology, the implications of scientific discoveries and the potential of science and technology to address problems of the contemporary world.

1. Students understand the basic facts, principles, theories and methods of modern science.
2. Students learn key events in the history of science.
3. Students provide examples of the inter-dependence of scientific and technological developments.
4. Students discuss social and philosophical implications of scientific discoveries and understand the potential of science and technology to address problems of the contemporary world.
**Student Evaluation**

**Participation:** Participation will be based on lecture attendance. Each student is entitled to one unjustified absence during the semester.

**Labs:** Laboratory exercises will be conducted during recitations. Attendance is required. Students should read through each lab and be prepared PRIOR to the lab session. It is the responsibility of each student to turn in the required laboratory exercise at the beginning of the lab class on the due date. All lab exercises must be completed INDIVIDUALLY, although working in groups is encouraged.

**Exams:** There will be four exams (three midterms and a final). Exams, including the final, are mostly non-cumulative but questions about some important themes/concepts will be present in more than one exam. These themes/concepts will be clearly communicated to the class prior to exams. Make-up exams are only allowed in the event of a documented emergency or through PRIOR consent of the instructor. All exams will take place at the regular lecture room. Midterm exams occur during regular lecture hours and the final exam will take place in the regular lecture room on Monday, December 12 from 10:00 to 11:45 AM. All exams will consist of multiple choice questions.

*Final grade determined as follows:*

- **Participation:** 10%
- **Lab:** 30%
- **Midterm Exam 1:** 10%
- **Midterm Exam 2:** 15%
- **Midterm Exam 3:** 15%
- **Final Exam:** 20%
**Extra Credit**

Two distinct activities will provide students with the opportunity of earning up to 5 extra points on their final course grade.

**Syllabus test:** There is the potential for 1.5 extra credit points on the final course grade for those who turn in a perfect syllabus test. The test is available on Carmen and a paper copy is due at the end of the lecture on Wednesday, September 7. There will be no partial grades. To get the 1.5 extra credit points all responses must be correct. One error = no extra credit. Even those that hand in a perfect syllabus test can lose the 1.5 points at any time during the semester if they ask one of the instructors a question that could be answered with information present on the syllabus.

**Citizen science cloud observations:** In this individual effort, up to 3.5 extra credit points on the final course grade will be awarded to students who act as observers for the “Student Cloud Observations Online (S’COOL)” project. This is a NASA led citizen science initiative aimed at collecting cloud cover data in order to improve satellite-based observations. The amount of extra credit received will be determined by the total number of reports handed in. Each report is worth 0.14 points. These are accumulated until 3.5 extra credit points are obtained (25 reports). Students are encouraged to perform more than 25 observations, but those who do will still receive the maximum 3.5 extra credit points. Only reports that are completely filled will count for the extra credit. If you hand in 25 partially filled reports you will get no extra credit points. To be valid, reports must be based on observations performed between Sept 1 and Nov 31. More details on how to perform observations and complete reports are can be found on the Extra Credit section in Carmen.

**Special Statement Regarding Absences**

Based on the Office of the Provost recommendations on the current flu situation, students that feel ill are encouraged to stay home and isolate themselves from others. In addition, the “Explanatory Statement for Absence from Class” self-reporting form available online (http://shc.osu.edu/posts/documents/absence-excuse-form.pdf) from the Wilce Student Health Center will be accepted as documentation of medical absence and reasonable efforts will be
made to provide for make-up work opportunities. All make-ups from documented absences must be **completed within one week** of the original scheduled date.

**Academic Misconduct**

It is the responsibility of the Committee on Academic Misconduct to investigate or establish procedures for the investigation of all reported cases of student academic misconduct. The term “academic misconduct” includes all forms of student academic misconduct wherever committed; illustrated by, but not limited to, cases of plagiarism and dishonest practices in connection with examinations. Instructors shall report all instances of alleged academic misconduct to the committee (Faculty Rule 3335-5-487). For additional information, see the Code of Student Conduct webpage (http://studentaffairs.osu.edu/resource_csc.asp).

**Disability Services**

The University strives to make all learning experiences as accessible as possible. If you anticipate or experience academic barriers based on your disability (including mental health, chronic or temporary medical conditions), please let me know immediately so that we can privately discuss options. You are also welcome to register with Student Life Disability Services to establish reasonable accommodations. After registration, make arrangements with me as soon as possible to discuss your accommodations so that they may be implemented in a timely fashion. **SLDS contact information:** slds@osu.edu; 614-292-3307; slds.osu.edu; 098 Baker Hall, 113 W. 12th Avenue.

*This is a tentative schedule. While exam dates will not change, the actual material presented in lectures at the time of any exam might not mirror the schedule precisely. The material covered in each exam will be clearly defined and communicated to the class by the instructor.*
**Lecture here means a cohesive presentation covering a whole theme, not a 55-minute class. Almost all lectures will be presented over more than one 55-minute class.**
