Rationale
This required graduate course provides an introduction to professional development within a learning community complementary to the rest of the Geography graduate curriculum.

Course goals
This class will orient students to the department, to the academic discipline of geography, and to the expectations of the Geography graduate program. Students will learn strategies to seek professionalization opportunities on an ongoing basis.

Course objectives
By the end of the semester, students will:
- Get to know the department, the university and key policies that affect them;
- Have explored a variety of components of academic success (e.g., publishing, external funding, peer networks, tenure) and success in teaching (e.g., course design and course feedback);
- Have had some exposure to the range of professional environments within which geographers work; and
- Learn how to document their academic accomplishments in a format most suitable for their goals.

Course evaluation
Successful completion of this course yields three (3) graduate pass/fail credits (S or U). There are three components to course evaluation:
- Class attendance and attendance of all departmental colloquia;
- Facilitation and participation in class discussion; and
- Turning in a portfolio that is compliant with the format required for Spring Review.
