

ODNR Division of Geological Survey  
2045 Morse Rd., Bldg. C-1  
Columbus, OH  
43229-6693

Phone: [\(614\) 265-6576](tel:(614)265-6576)

1. We are looking for someone on a graduate level, as research capabilities are needed.
2. The candidate should possess strong Arc GIS skills, including skills in interpolation techniques.
3. The work would be at the Fountain Square office of the Ohio Department of Natural Resources on Morse Road.
4. The work could be up to 20 hours/week.
5. Salary to be determined, no benefits.
6. The project aim would be to help compile resource estimates of coal seams in Ohio.
7. Some knowledge of geology would be very helpful.
8. The work would entail drafting maps, gathering point data of coal elevations and thicknesses, and compiling this data into a geodatabase.
9. The data would then be verified for accuracy. The points would then be interpolated to create structure and isopach maps.
10. The results would be compiled into a report when finished.
