Position Announcement Posting 0013321

**ASSISTANT/ASSOCIATE PROFESSOR
Geospatial Intelligence and Planning Leader**

Position: The College of Earth, Ocean, and Atmospheric Sciences (CEOAS) at Oregon State University (OSU) located in Corvallis, Oregon, invites applications for a full-time 1.00 FTE 9-month, or part-time 0.75 FTE 12-month tenure-track Assistant/Associate Professor to contribute to OSU's Provost Initiative in Marine Studies, bolstering and coordinating expertise in Geospatial Intelligence and Planning across campus. Exceptional individuals with demonstrated leadership may be considered at the tenure-track associate level. The position is anticipated to begin in September, 2015.

Position Summary

Geospatial Intelligence & Planning is the development and use of large geospatial/temporal datasets to help inform effective decision making, particularly in regard to environmental and global security. The increase in remotely sensed data, computer power and connectivity, and communications technology offers decision-makers tools with which to make better informed decisions through unprecedented analysis of issues including water and food security, climate change, coastal processes, human health, spatial planning, risk mitigation, natural disaster relief, and resource management. The successful candidate is an assistant or associate professor with a proven record of or potential for leadership and strong expertise in geospatial analysis including expertise in working with large spatial/temporal datasets, image interpretation, spatial/temporal modeling, and cartography. The candidate is a leader and coordinator who conducts research, teaching, and outreach to develop fundamental concepts and methods in geospatial intelligence linking large spatial datasets, decision making and policy analysis. Special consideration will be given to candidates whose research arena incorporates marine issues in a broad sense, covering "ridge to ridge" (from the mountains to the mid-ocean ridge). Consistent with the OSU strategic plan and signature areas, the candidate will help unify and coordinate related efforts across campus, and will lead efforts to build a new Certificate in Geospatial Intelligence and Planning, including teaching a grad/undergrad cornerstone course in their area of expertise.

The Marine Studies Initiative (MSI) will be a transformative approach to the study of marine systems, incorporating both the natural and human environment, and covering "ridge to ridge" (from the mountains to the mid-ocean ridge). It will focus on linking the natural and social sciences of marine systems, use these bridges to build new collaborative approaches to policy and decision-making, and develop and incorporate data-intensive methods in research and education. The initiative will build on the existing strengths in marine sciences, geospatial science, environmental economics, and public policy at Oregon State University. The MSI will encompass both research and education by building new programs at the undergraduate, graduate, and post-graduate levels.

Faculty at OSU are committed to undergraduate and graduate student success. We seek faculty who have evidence of educating and mentoring a diverse group of learners, which may include experience with sponsoring student research or internships, developing study abroad opportunities, service learning courses, or the use of innovation pedagogies such as hybrid or online learning.

Position Responsibilities

Teaching and research/outreach-related appointment with an expectation for scholarly accomplishments appropriate to the position focus and responsibilities. The successful candidate will teach undergraduate courses with a focus on geospatial intelligence and planning, and courses in the Baccalaureate Core and part of the new Marine Studies Initiative, as well as graduate courses in the College of Earth, Ocean, and Atmospheric Sciences. Research will be interdisciplinary and will incorporate geospatial intelligence approaches to biophysical, ecological and marine system science research and outreach to address critical societal issues. The position will have an academic tenure home in CEOAS, and will work in partnership with the faculty developing the Marine Studies Initiative.

The position includes:

- 40% Research and proposal writing: Establish and maintain a program of research that supports timely promotion in rank, significant contributions to the field, and continued external funding. Work towards distinction in research as evidenced by national recognition. Research activities are expected to result in publications that advance knowledge and understanding. Results of research should be disseminated in peer-reviewed journals, conference proceedings, and books appropriate for the discipline, as well as in presentations at national and international scientific meetings. Put forth a competent and professional effort to obtain external funding for their research programs and those of their students.
- 40% Teaching and advising. Teach undergraduate and graduate courses in fundamental methods of geospatial analysis applied to large spatial/temporal datasets, image interpretation, spatial/temporal modeling, and cartography, and in GIScience (e.g., Geographic Information Systems and Science, geospatial programming and modeling, and Responsible GIS practice), as well as a capstone course for the new Certificate in Geospatial Intelligence and Planning. Activities also include assisting with student research and internships, mentoring and advising students, and designing curriculum.
- 10% Leadership and coordination of those with similar interests across campus, and connecting these efforts with security policy.
- 10% Service to the disciplinary group, the college, and the profession.

CEOAS faculty are committed to enhancing student success by engaging students in interdisciplinary research, internships, local and global studies, and other experiential learning opportunities.

Minimum/Required Qualifications:

- PhD by the start of employment in geography or other degree field that supports

geospatial intelligence and planning

- Active research agenda showing outstanding scholarship including a demonstrated ability to obtain extramural funding, a robust publication record, and a demonstrated record of successful interdisciplinary collaborations
- A strong potential for mentoring graduate students, post-doctoral fellows, and undergraduate researchers as evidenced by commitment to student success
- Demonstrated record or promise of leadership in broad initiatives with applied policy foci
- Demonstrated understanding of both academic and security cultures and ability to communicate within and between them
- Demonstrable ability to foster productive relationships with a broad range of government agencies and commercial companies engaged in geospatial intelligence
- Commitment to teaching excellence and student success
- Proficiency in oral and written English
- A commitment to educational equity in a multicultural setting and to advancing the participation of diverse groups and supporting diverse perspectives

Preferred Qualifications:

- Assistant or associate professor standing with four or more years of professional experience.
- Demonstrated international experience in at least one of the five focus areas (geohazards, energy and natural resource security, public health preparedness, data intensive geospatial science & technology, coastal/marine policies)
- Demonstrated experience in developing multi-disciplinary curricula
- Demonstrated experience in a leadership role that includes fund-raising and development

To Apply: To access application instructions, go to

https://jobs.oregonstate.edu/applicants/jsp/shared/position/JobDetails_css.jsp

and for the position announcement, go to <http://www.coas.oregonstate.edu/>

When applying you will be required to attach the following electronic documents:

- 1) Curriculum Vita
- 2) A cover letter of application addressing your qualifications and a statement of vision for the position referring specifically to our qualifications lists.
- 3) Contact information for three current references, including their name, title, address, phone number and e-mail address.(Attach as Other Document)

For information regarding CEOAS see <http://www.coas.oregonstate.edu/>.

For additional information regarding this position please contact: Prof. Aaron Wolf by email (wolfa@geo.oregonstate.edu), 541-737-2722.

Closing Date: For full consideration for this position, your application must be received by **January 15, 2015. Search closes on February 16, 2015**

University and Community:

Oregon State University's commitment to student success includes hiring, retaining, and developing diverse faculty to mentor and educate our undergraduate and graduate students from entry through graduation. Our Strategic Plan (<http://oregonstate.edu/leadership/strategicplan/phase3>) articulates the strategies we believe critical to advancing and equalizing student success. As part of this commitment, OSU has established a hiring initiative for 2014-15 that is designed to support these strategies, of which this search is a part.

OSU is one of only two American universities to hold the Land-, Sea-, Sun- and Space-Grant designations and is the only Oregon institution recognized for its "very high research activity" (RU/VH) by the Carnegie Foundation for the Advancement of Teaching. The university is comprised of 11 academic colleges with strengths in natural resources, Earth dynamics and sustainability, life sciences, entrepreneurship and the arts and sciences. OSU has facilities and/or programs in every county in the state, including 12 regional experiment stations, 41 county extension offices, a branch campus in Bend, a major marine science center in Newport and a range of programs and facilities in Portland. It is Oregon's largest public research university, conducting more than 60 percent of the research funded throughout the state's university system.

The College of Earth, Ocean, and Atmospheric Sciences is internationally recognized as a leader in the study of the Earth as an integrated system. It operates numerous state-of-the-art laboratories and two oceanographic research vessels, the 177-foot ocean-going Oceanus and the Elakha, a 54-foot coastal research vessel. The College has an annual budget of more than \$50 million, with much of the research support coming from the National Science Foundation, National Oceanic and Atmospheric Administration, National Aeronautics and Space Administration and other federal agencies. It has approximately 104 faculty, 220 graduate students and 613 undergraduate students. Graduate programs include Master's and PhD degrees in Ocean, Earth and Atmospheric Sciences; Geology; and Geography and a Master's degree in Marine Resource Management. The college has undergraduate programs in Earth Sciences and Environmental Sciences, with minors in Environmental Geosciences, Environmental Sciences, Geography, Geology, and Oceanography.

OSU is located in Corvallis, a community of 53,000 people situated in the Willamette Valley between Portland and Eugene. Ocean beaches, lakes, rivers, forests, high desert, the rugged Cascade and Coast Ranges and the urban amenities of the Portland metropolitan area are all within a 100-mile drive of Corvallis. Approximately 15,700 undergraduate and 3,400 graduate students are enrolled at OSU, including 2,600 U.S. students of color and 950 international students.

OSU is committed to a culture of civility, respect, and inclusivity. As an Affirmative Action/Equal Opportunity employer, OSU values diversity in our faculty and staff regardless of their self-identity; to that end, we particularly encourage applications from members of historically underrepresented racial/ethnic groups, individuals with disabilities, veterans, women, LGBTQ community members, and others who share our vision of an inclusive community.
